

Mohcene Meradji

Bioprocess Engineer

✉ mohcenmeradji@gmail.com ☎ +213697330205 📍 Constantine, Algeria

SUMMARY

Passionate and detail-oriented Bioprocess Engineer with a strong academic foundation in microbial biotechnology and extensive hands-on internship experience. Proven skills in both upstream and downstream processing, quality control, and bioprocess optimization. Eager to leverage technical expertise in GMP-compliant environments to contribute to cutting-edge biopharmaceutical manufacturing.

EDUCATION

National higher school of biotechnology - Taoufik kheznadar	2024 – 2026
<i>Masters in Microbial biotechnology</i>	Constantine, Algeria
• Academic Standing: Graduated with distinction, specializing in Microbial Biotechnology. • Core Modules: Advanced Genetic Engineering, Industrial Microbiology, Bioprocess Scale-up, and Metabolic Engineering. • Master Thesis / Project: Focused on applying molecular tools and optimization strategies for microbial systems, reinforcing hands-on expertise in genetic manipulation and strain development.	
National higher school of biotechnology - Taoufik kheznadar	2021 – 2026
<i>State Engineer in Biotechnology</i>	Constantine, Algeria
• Specialized Curriculum: Focused on Bioprocess Engineering, Bioreactor Design, Transport Phenomena, and Unit Operations. • Key Competencies: Gained strong foundational knowledge in aseptic techniques, culture media formulation, and upstream processing control. • Engineering Practice: Developed practical troubleshooting skills for biological systems and chemical engineering processes applied to biotechnology.	

SKILLS

Bioreactor operations		Upstream/Downstream processing	
Bioprocess Optimization		Technical troubleshooting	
Microbial culture techniques
